---

## Experience

**System Developer**, inQuesti, São Paulo, Brazil

**Sep 2015 - Current**

- Responsible for the design and development of a mobile and web product using: C# with Xamarin for mobile development, HTML, CSS and Javascript for web development and Python for server development.
- Use the agile method Scrum for the project management with the tool Jira.
- The project is not done yet. The mobile application will have the first version due April 15th.

**Security Analyst**, St Cloud State University, St Cloud, USA

**May 2015 - Aug 2015**

- Working with synchronization of all devices in the network running the program fail2ban, gathering all logs into one place, making it easier to analyze.
- Used multiple instances of FreeBSD OS to emulate an test environment which was composed of a mail server (RoundCube with apache), MySQL server and a web serve with security. The language used was Java.

**Intern**, inQuesti, São Paulo, Brazil

**Mar 2014 - Jul 2014**

- Developed Business Intelligence projects using Qlikview, participating in all steps of the project (requirement elicitation, costs evaluation, development, documentation, implementation and maintenance).
- Demonstrated ability to learn quickly the new software getting advanced knowledge in short time allowing independence in project's development.
- Coordinated and supervised other interns in projects or project's tasks.

**Game Design**, UFABC , Santo André, Brazil

**Sep 2012 - Jul 2014**

- Volunteer member of a game development staff, whose objective was to develop an educative game with a marine environmental theme.
- Participated in all the main steps of a game design: game design, level design, implementation in Game Maker.
- Demonstrated capacity to work both independently and in a team environment.

**Intern**, BRF, São Paulo, Brazil

**Aug 2011 - Aug 2012**

- Designed, developed and implemented a Business Intelligence application on excel using VBA which was used as an alternative solution for the Business Objective that was not operating properly.
  - Tested the results of the implementation of a new project to increase the customer satisfaction.
  - Instructed new employees in the sector tasks and the sector's operation model.
  - Designed and developed solutions to optimize the operations of the own sector and other sectors.
-
